**Background**

The purpose of the HIV Counseling and Testing Prevention activities is to prevent the transmission of HIV or reduce the number of new HIV infections; increase the number of persons who know their HIV status; reduce associated morbidity and mortality among HIV-infected persons and their partners by assuring referral to medical, social, and prevention services. The 15-year history that the Austin/Travis County Health & Human Services Department (HHSD) has had with Prevention Counseling and Partner Elicitation (PCPE) testing and counseling is marked with innovation and customer-friendly services to best serve the citizens of Austin and Travis County.

The City of Austin Health and Human Services Department (HHSD) has received an additional \$7,620 dollars for an increase in the travel budget and the purchase of equipment including: binocular microscope, multi-media projector, and a phlebotomy chair. The additional money will assist the HIV PCPE program to improve quality of care and improve customer service, and provide valuable training for HIV PCPE staff. This additional funding will not impact performance measures.
